Dev ShrungarBhai Patel

Profession Summary

Full Stack Developer with hands-on experience building scalable web applications using Java, Spring Boot, MySQL, and front-end technologies like HTML, CSS, and JavaScript. Proficient in developing RESTful APIs, integrating databases using JDBC, and deploying responsive UIs. Committed to clean code practices, debugging, and agile development.

LinkedIn

KeySkills: Java, Spring Boot, Spring MVC, JDBC, JPA, Hibernate, Servlets, JUnit.

Databases: MySQL, PostgreSQL

Frontend: HTML, CSS, JavaScript, Bootstrap.

Tools: Eclipse, Postman, Liquibase, Git, GitHub.

Concepts: REST APIs, OOP, MVC Architecture.

Education

Bachelor Of Engineering	May 2024	ECT	GTU - Gujrat, IN
Diploma in Computer Engineering	May 2021	S B Polytechnic	GTU -Gujrat, IN
Secondary School Certificate	May 2018	Saint Arnold's High School	GSEB -Gujrat, IN

Achievements

– Secured 3rd rank in 7th semester at GTU among Computer Engineering students.
– Successfully led a backend project team during BIT internship in 2024.
– Built 3+ complete personal projects and actively contribute to GitHub.

Academic Innovation Project

Employee Management System

– Developed a CRUD-based employee management web app using Spring Boot and MySQL.
– Designed REST APIs for adding, updating, deleting employee records.
– Tested endpoints using Postman and used JPA for seamless database mapping.
– View project: https://EmployeeManagementSystem

Dev's Sport Store

– Created a modern e-commerce website using HTML, CSS, Bootstrap, and JavaScript.
– Designed product pages, responsive layouts, and basic shopping cart structure.
– View project: https://Dev'sSportStore.com

Full Stack Developer Trainee/Intern June 2024 – July 2025
— Q Spiders Training Institute

– Received hands -on training in Java, Spring Boot, Hibernate, and REST APIs.
– Contributed to the end-to-end development of real-world projects in an Agile environment.

COREBANK (Banking Management)
– Developed a CoreBank web app using Spring MVC, Servlets, and JSP for a dynamic user interface.
– Implemented CRUD operations for account creation, updates, and transaction management.
– Enabled user registration, login, and secure transaction handling.
– Used MySQL as the backend database for data storage and efficient processing.
– View project: https://CoreBank.Com

Tools / Technologies – Java, Spring Boot, MySQL, HTML, CSS, JS, BootStrap5.

Java Backend Developer — Jaina Software Solution July 2025 - Present

1 Academic Administration System (SIP)

– Contributed to the backend development of a web-based student management platform (similar to abacus learning systems) covering admissions, fee tracking, student profiles, and data handling.
– Created and optimized RESTful APIs for UI integration and data storage using Java, MySQL, and Liquibase for schema migrations.
– Ensured system reliability by thoroughly testing all backend APIs with Postman.
– Built Excel export modules enabling administrators to download student and fee data directly from the database in a structured spreadsheet format.

Tools / Technologies – Java, Spring Boot, PostgreSQL (DBeaver), Postman, Git, JUnit.

2 DATAWISE

– Worked on DataWise, a supermarket billing system that processes invoice/XML files uploaded by the owner.
– Built backend modules to parse XML data, classify products (grocery, fuel, lottery, etc.), and store them into structured tables such as transaction summary, transaction product, and transaction payment.
– Implemented backend APIs to support date-wise filtering and display categorized reports on the UI.

Tools / Technologies – Java, Spring Boot, MYSQL, Postman, Git, JUnit, SourceTree.
